

MainApp.java

```
package com.library;

import org.springframework.context.ApplicationContext;
import
org.springframework.context.support.ClassPathXmlApplicationContext;

import com.library.service.BookService;

public class MainApp {

    public static void main(String[] args) {

        ApplicationContext context =
            new ClassPathXmlApplicationContext("applicationContext.xml");

        BookService service = context.getBean("bookService",
BookService.class);

        service.displayBooks();
    }
}
```

Output

Book Service is working.
Book Repository is working.
